| HÖGANÄS 260 |

The new Höganäs 2-series consists of top-quality Swedish-made office chairs. We have used our Småland ingenuity to design and package a fantastic sitting experience, along with a sleek, modern design. At the most attractive price possible. A chair for everyone, but customised for you!

Although all Höganäs office chairs are designed to make long periods of sitting more comfortable, there are times when a chair with a short back is more suitable. Are you often on the go? Then the model 260 might be for you. 260 combines sleekness and simplicity without compromising on ergonomics or comfort, and as with our other models, you have the opportunity to tailor the chair to your needs. To activate the body, we advise you to use the chair in the unlocked position. This means that the recline mechanism and seat follow the body's movements, offering you active sitting.

LUMBAR SUPPORT CUSHION

Add our inflatable lumbar support cushion to further raise the comfort level.

ACTIVE SITTING

To activate the body, we advise you to use the chair in the unlocked position. This means that the recline mechanism and seat follow the body's movements, offering you active sitting.

NICE & EASY ADJUSTMENT

It should be nice and easy to sit comfortably and adjust position. Therefore, we made the chair's controls easy, clear and logical to operate.
