# SILENTO | WALL

## CLEAN

*Silento Wall™ Clean is a modern wall absorber that can be used in various ways to construct unique designs in different colours. Despite its hexagonal shape, Clean gives a soft impression, with fabric-covered edges and corners.*

*Clean is just as suited to offices as to meeting rooms or reception areas - only you and your imagination set the limits. Put together a work of art that creates a more pleasant sound environment at the same time.*

### MIX & MATCH

Build your own work of art that at the same time dampens the sound level and reduces the echo.

Clean is available in five different fabric colours as standard: brown, rust, black-grey, dark grey and grey. Own fabric choice against quote.

### EASILY ATTACHED

Clean is easily attached with a Velcro strip that is screwed to the wall.

### LOWERS THE NOISE LEVEL IN THE OFFICE

The products in the Silento Wall™ series are sound-tested in 200 m<sup>2</sup> environments, and achieve substantial noise suppression in the most common frequency ranges for office environments.

### SUSTAINABILITY AND ENVIRONMENT

The basic material of all absorbers in Silento Wall™ is comprised of 100% recycled PET. The fabric is called Gabriel Hush, and is certified in accordance with Standard 100 by OEKO-TEX®.

Both the fabric and the basic material are tested and approved in relation to Euroclass fire ratings (B-s1, d0).
