| SURF FREEFLOAT |

Surf is a chair that combines flexibility and simplicity without cut down on ergonomic thinking and comfort.

The freefloat function means that the seat and the back can move independently of each other and the various parts can also be locked in the desired position. This means that you can choose to lock the back position and let the seat "float" and follow the movement of the body or vice versa.

NECK REST

The neck rest is adjustable in height, depth and angle.

ARMREST

The armrests can be raised and lowered, angled and adjustable in width, lateral and depth.

ADJUSTABLE BACK & SEAT

The back is adjustable in height, which means that the lower back can adapt to your back. The seat is adjustable in depth.

FREEFLOAT SWING

The Freefloat mechanism allows the user to precisely find their position and lock the chair in that position. It also gives the opportunity to get a more open angle in the hip joint when sitting backwards, which facilitates circulation to the legs. The swing resistance is adjustable.

PERFORMANCE	ART.NO
Freefloat High	OLS 250 HFXXX
Freefloat High with neck rest	OLS 250 HFNXXX
Freefloat Mid	OLS 250 MFXXX

MEASUREMENT SURF HIGH	
Back width	420 mm
